

QUALITY POLICY

The company is committed to providing a competitive, quality heat treatment and ancillary process service to the Light Metal industry, with consideration to the company's impact on the environment, via development of heat treatment methods, employees and working towards goals and objectives, as detailed in the company Business Plan,

The use of on time internal audits will be made to ensure the company complies with the requirements of AS 9100:Rev D incorporating BS EN ISO 9001:2015 and as a basis for continual improvement of the quality management system.

This Quality Policy will be communicated and understood throughout the organisation

An annual management review of this Quality Policy will be carried out and any agreed changes will be made to ensure continuing Quality Policy suitability.
